Be Original.

# Smart water for the smart business.

Businesses everywhere are undergoing a revolution: from new technologies to new ways of working. And you need to balance these changes while creating a smart working space.

So, what if there was an easy way to better your social responsibility, improve your amenities, and decrease your effect on the environment?

Well, there is. The Skywell® 5TE atmospheric water generator creates clean water from the air around us, reducing the use of pipes and plastics. Every drop of water is filtered, purified, tested and continuously monitored to ensure quality, clarity and flavour.

## **Change your business**

To get the benefits of an agile, connected workforce, you know a smart business is vital. With the Skywell, you can reduce plastic waste, and make life easier for your employees, customers and visitors.

It's a convenient, portable way to provide water. You can put the Skywell exactly where you want. From conference rooms and busy hallways, to event set-up and outdoor offices, you can provide fresh, clean water anywhere. Connect it to a power source and you're ready to go.

Plus, it generates up to 18 litres of clean drinking water every day, so you don't need to worry about running out.

***The Skywell® 5TE is an easy way to improve your facilities and your environmental impact.***

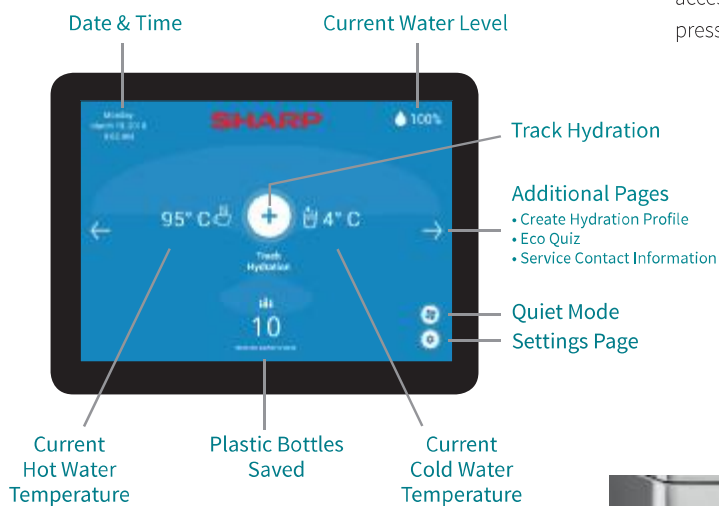

# No plastic. Just water.

## Change your routine

People know more and more about the health problems caused by dehydration. So, when you combine the eco-friendly nature of the Skywell with its ability to track water intake, you've got a device that people will love.

Users can access statistics about how much water they're drinking. And they can even set daily drinking goals.

Plus, its interactive touchscreen and dashboard lets you quickly and easily adjust settings like water temperature. Whether you want hot water for tea, coffee or food, or a cold, refreshing glass of water, it's ready instantly.

Please note: Company logos, images or videos can be customised on the interactive touchscreen. The Sharp logo is shown for demonstration purposes only.

## Change your environment

Environmental targets and social responsibility requirements are getting tougher to meet. The Skywell is an easy way to lower your impact on the world. It reduces your reliance on plastic. And it cuts down your carbon footprint, thanks to a lack of pumping, shipping or delivery.

Unlike traditional water coolers, it doesn't have large vehicles delivering bottles that require handling or storage. Even better, it lets you wave goodbye to single-use plastic – a huge global issue.

Thanks to the Skywell's smart interactive app, you can monitor the positive environmental impacts you make. And this easy access to statistics is perfect for compiling company reports and press releases.

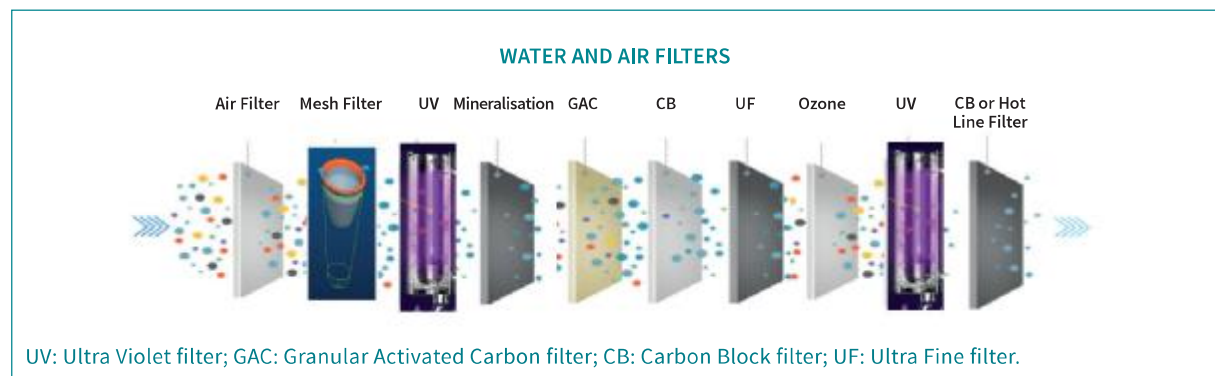

# Specifications

## General

<b>Model</b>	5TE
<b>Dimensions</b>	1235 x 327 x 507mm (HxWxD)
<b>Weight (approx.)</b>	75 Kg
<b>Power requirements</b>	Rated local AC voltage $\pm 10\%$ , 50/60 Hz
<b>Energy consumption (max.)</b>	1.01kW (220 to 240V)
<b>Sound level</b>	53dB
<b>Refridgerant types</b>	R134a & R410a
<b>Cold water power</b>	70W
<b>Hot water power</b>	850W
<b>Dispense temp. range</b>	2.8°C - 97.8°C
<b>Collection tank capacity</b>	6 L
<b>Cold tank capacity</b>	10 L
<b>Hot tank capacity</b>	0.8 L
<b>Warranty</b>	1 year on device, 5 years on compressor

## How the Skywell® 5TE works.

The Skywell takes in ambient air and collects moisture through condensation. Advanced monitoring technology, in combination with six filters, two ultraviolet lights and ozone treatment, ensures the purity of every drop of water. Plus, it's continually monitored to guarantee high quality, clarity and flavour.

The Skywell atmospheric water generator requires suitable environmental conditions to generate water to optimal capacity. In areas of lower humidity or when low humidity occurs, which may affect water produced, it can be connected to a supplemental mains water source and water quality maintained through use of the filtration system.
